You're welcome! I was surprised to not see your name in the address line. Karen sent a reminder to Federico and Patti to send it out. Maybe because she didn't cc you at that time, Patti just responded with it.

Something v. important to note in the attached file, something that is not at all clear from discussion, is that Patti did take out the phrase "by relocating the SWP and CVP intakes." So Federico was incorrect when he said the current project purpose statement is the one in the 2009 NOI.

I structured the meeting agenda so that we establish first what the current proposal is for project purpose statement at the start of that topic.

Thanks for passing this on, otherwise I would not have gotten it. The whole P&N thing is certainly very "interesting" and it sure would be nice if all participants in the discussion realized that Purpose and need are two separate things.

did you get this? it is a small part of their purpose and need chapter;
purpose statement only. would be good if participants would not equate
purpose with need statement. it gets confusing when people do that in
conversation.

call into hagler about our suggestions for MOU. will b in touch soon on
that, sorry for delay. i didn't have any substantive changes to your draft
MOU. saw few typos.

Subject: RE: BDCP EIS
(See attached file: Draft EIR_EIS Purpose
Statement_psi_6-17-11.docx)

Karen,

The attached Purpose Statement is from the most current (July 2010) version of Section 2.2 of the BDCP EIR/EIS. Given the consultant's on-going work slowdown, no further changes to this section have occurred since then. Our plan is to include the same interpretational language as contained in the response to EPA's letter to Reclamation, USFWS, and NMFS (EPA letter dated June 10, 2010) in Section 2.2 of the EIR/EIS by adding a paragraph to the attached text. Looking forward to discussing this issue in more detail at our meeting with the Corps and EPA next Wednesday.

Patti Idlof

As we talked about this morning, we'd like to see chapter 2 of the draft EIS that Federico referenced. Sounds like it will help as we resolve the Purpose and Need issues. It could be that I can access it thru the BECT site - but its been so long I've lost my access info. Thanks!
